

Nama : Andini Wulandari

NIM : 20.01.013.020

Kelas : AI/3B

TUGAS :

1. Membaca CSV

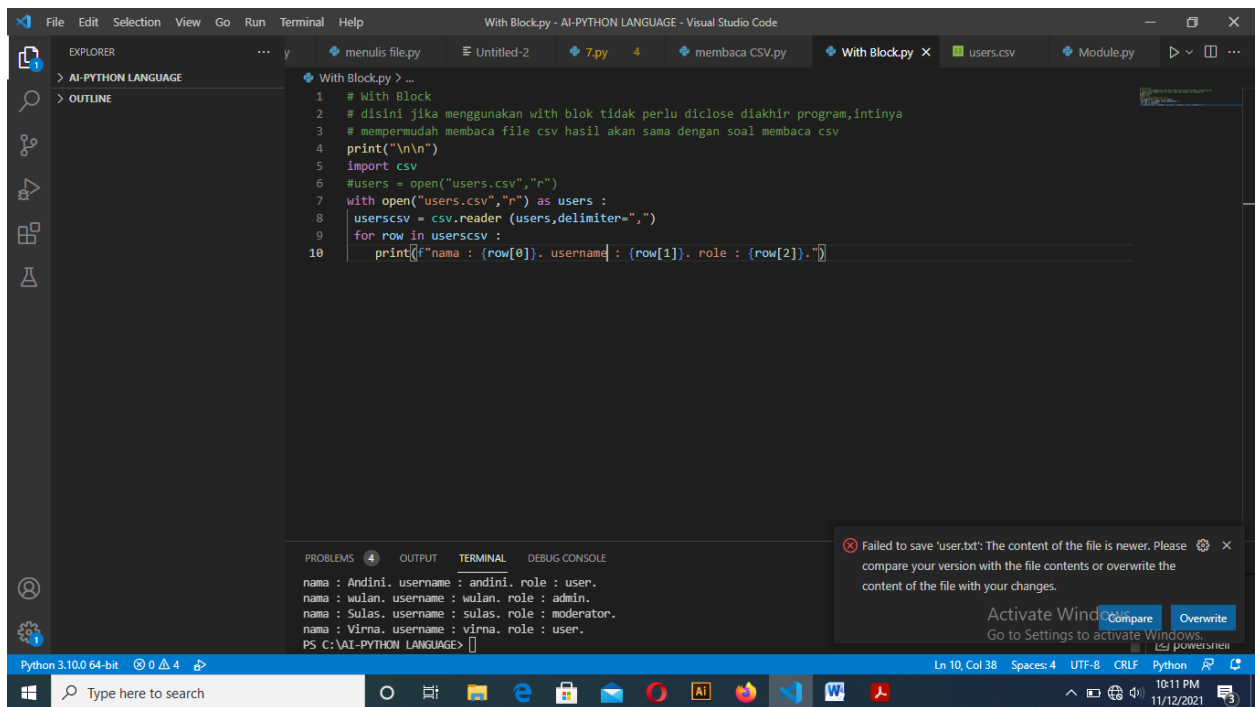

The screenshot shows the Visual Studio Code editor with a Python file named `membaca CSV.py`. The script reads a `users.csv` file and prints the contents. The terminal output shows the following data:

```
AI-PYTHON LANGUAGE\membaca CSV.py
nama : Andini, username : andini, role : admin.
nama : Fadilah, username : fadilah, role : moderator.
nama : Anggun, username : anggun, role : user.
PS C:\AI-PYTHON LANGUAGE>
```

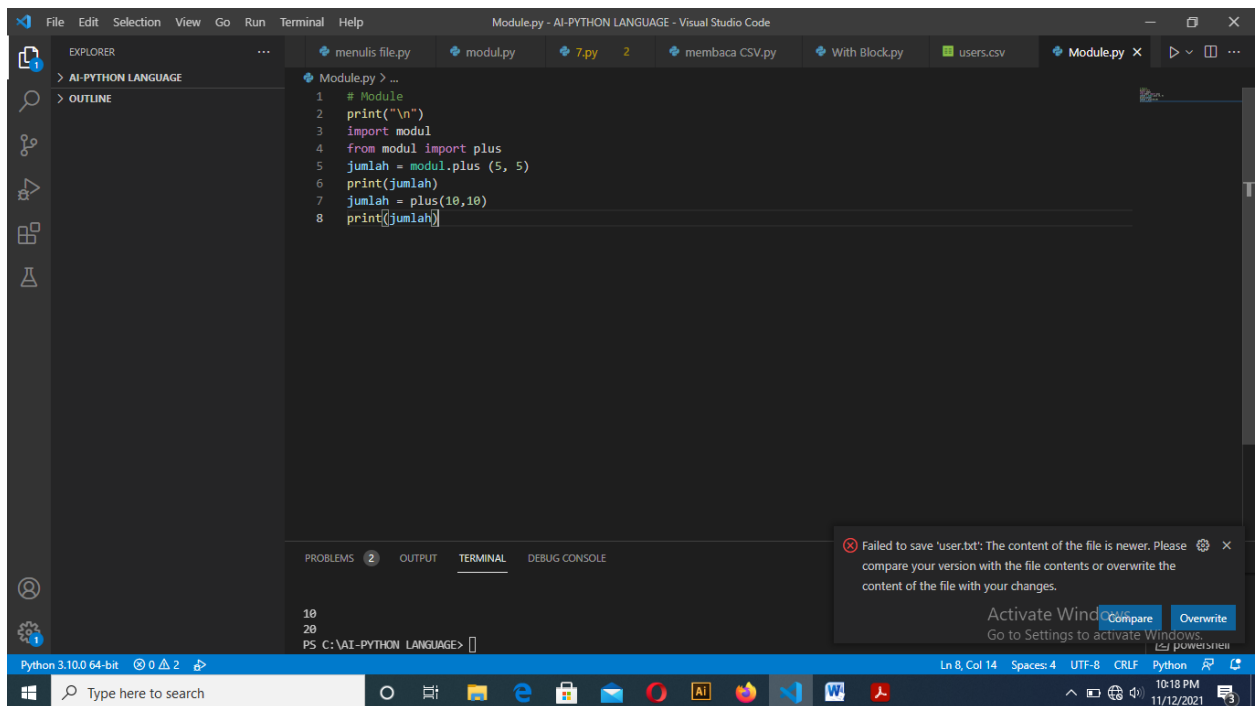

The code in the editor is as follows:

```
1 # Membaca CSV
2 import csv
3
4 users = open("users.csv","r")
5
6 users_csv = csv.reader (users,delimiter=",")
7
8 for row in users_csv:
9     print(f"nama : {row[0]}. username : {row[1]}. role : {row[2]}.")
10
11 users.close()
12
```

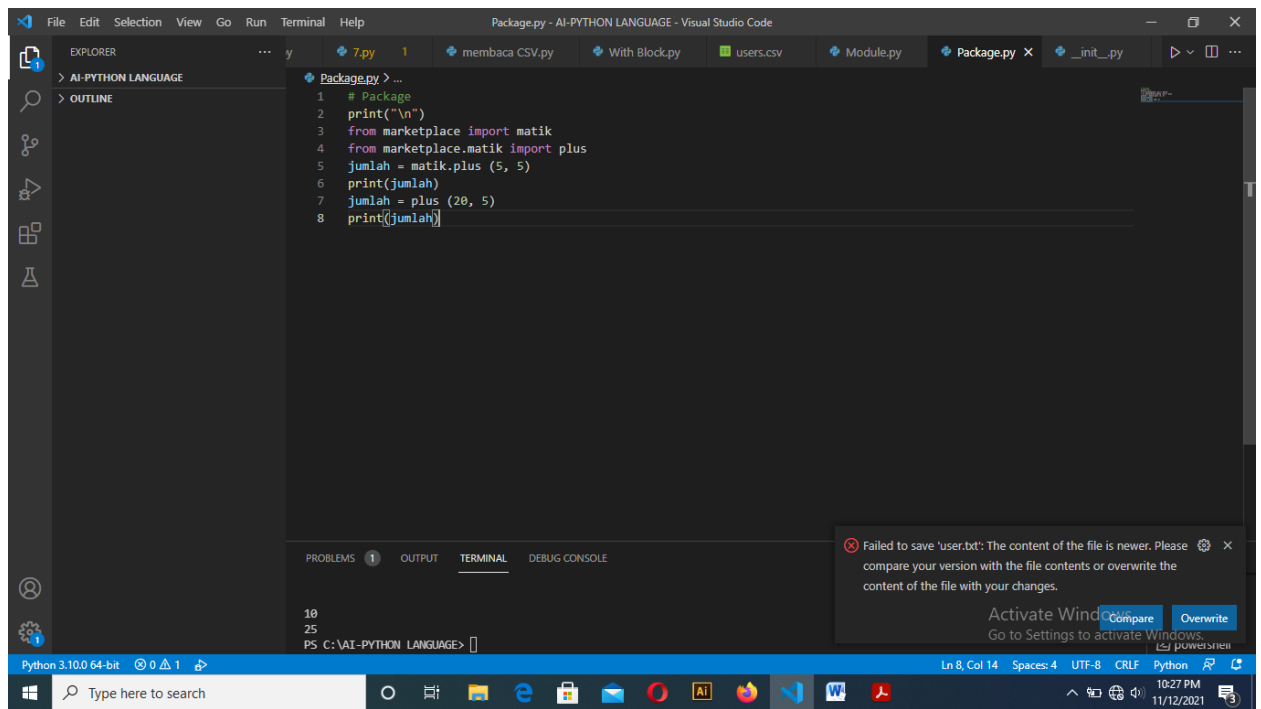

2. With Block

3. Module

4. Package

5. Random

6. PIP dan Virtualenv

7. Meteri selanjutnya
